Exhibition - Shadow on us - Tamir Bayarsaikhan

Who stands in the sun, projects shadows: such is the thought that inhabited Tamir Bayarsaikhan in his peregrinations across the Valais. He laid his artist's look on every trace of human presence visible in the landscape. Whether our actions are felt as appropriate or aberrant, nature reacts to them at every moment, inevitably. The images collected by the Mongolian photographer are sometimes breathtakingly beautiful, sublimely calm, sometimes agitated, troubled, witnesses of dramatic events. An exhibition similar to a Valaisan illustration of the famous « butterfly effect ».
